College Application Essay

“What draws me the most to this institution is that we share a common vision. It is often difficult to be in tune with one’s environment and produce outstanding results. My interest in business administration and sports have fueled my fire and desire to succeed. I think this institution gives its students the best chance to interact and grow within a multicultural environment which is always quite welcoming. The experience such an opportunity provides is priceless, not only due to the positive community but also thanks to the faculty. Having a dedicated staff that puts students growth into perspective is a great way to get ready for the challenges of life as an adult. Throughout my studies, I have obtained a basic understanding of business and its various components. Nonetheless, I would like to develop my knowledge regarding its management. Since I am quite outgoing and friendly working with people comes naturally to me, despite the difficulties that sometimes occur when handling a company's human resources.

Having completed the IB programme in 2012, I am quite comfortable with tight deadlines as well as approaching my work from a holistic perspective. With that in mind, it is quite apparent why this State University intrigued me. Luckily, we were given a presentation at my high school which inspired me to get more information online. The diversity of available courses as well as study groups is almost a bit overwhelming but extremely attractive at the same time.

Similar to most students having experienced some form of lectures from a young age, it is entirely revitalizing to approach academia interactively. The lecturers use of case studies, and modern-day examples we can research in various business journals represents a rare culinary delight leaving you asking for more. Despite my growing interest in the field of management I yet to have the opportunity to get any real experience in a corporate environment. Nonetheless, I have organized a few fundraisers as well as ran a successful small snack bar. By examining various business case studies and assessing what helped them succeed or fail I hope to be able to build on top of my current knowledge.

This State University has all the necessary tools to develop the country's future generation of leader. By allowing its student body to collaborate and interact with each other on various projects involving two or more departments it creates a real-life learning environment. Such an interactive approach to learning is just what I am looking for since education is meant to prepare me for the everyday challenges of having adult responsibilities. Overall, I am looking to soak every ounce of knowledge that is bestowed upon me throughout my time at this institution. I hope to be able to contribute in a positive way to the community of this state university by encouraging those around me to share the same intellectual curiosity.”
